

JOABE BENÇÃO ROCHA SANTOS

Decision Scientist | Analytics Engineering

São Paulo, Brazil | jbencao37@gmail.com | [LinkedIn](#) | [GitHub](#) | US Visa: B1/B2 (Valid)

PROFESSIONAL SUMMARY

Decision Scientist and Analytics Engineer with 4+ years translating complex business problems into measurable analytical solutions across global environments. Proven track record building data products that drive executive decision-making, designing scalable data models, and partnering directly with international stakeholders to deliver insights that influence commercial and operational strategy.

Combines a strong technical foundation (Python, SQL, PySpark, dbt, Databricks, Snowflake) with hands-on experience in A/B testing, time-series forecasting, and customer segmentation. Comfortable owning the full path: ambiguous question → KPI definition → data model → executive narrative.

Specialization in Applied Statistics. Fluent English with active US B1/B2 visa.

SELECTED ACHIEVEMENTS

- Promoted from Junior to Senior Data Analyst at AB InBev BEES within 2 years, contributing to platform-critical data migrations and KPI frameworks adopted across global markets.
- Designed data models and analytical layers supporting BEES marketplace operations across LATAM, enabling executive-level decisions on commercial performance and customer segmentation.
- Currently delivering analytics engineering for a global insurance client via Capgemini, partnering directly with US-based product and business teams in a daily English-speaking environment.
- Specialization in Applied Statistics complementing a technical degree from FATEC, providing quantitative depth that supports rigorous experimentation and statistical analysis.

PROFESSIONAL EXPERIENCE

Associate Decision Scientist (Senior Data Analyst / Analytics Engineering) | Capgemini — Global insurance client (US) *Sep 2025 – Present*

- Partnered with US-based stakeholders at a global insurance client to design end-to-end analytical datasets and pipelines, ensuring reliability for executive reporting and ML use cases.
- Built data models and curated layers on Snowflake using dbt, supporting dashboards and analyses consumed across product and operations teams.
- Implemented data quality and validation frameworks (tests, freshness checks, documentation), improving trust and adoption of reporting outputs at leadership level.
- Translated ambiguous business requirements from senior stakeholders into standardized KPIs and metrics frameworks, enabling consistent performance tracking across cross-functional teams.
- Designed and analyzed A/B tests and observational studies to support product and operational decisions.
- Collaborated daily with international teams across time zones, ensuring alignment and clear communication of analytical outputs in English.

Data Analyst (BI & Analytics Engineering) | AB InBev — AMBEV / BEES Global *Nov 2024 – Sep 2025*

- Led the design and optimization of ETL pipelines (Databricks, PySpark) supporting BEES marketplace operations across global markets, improving data availability for commercial decision-making.
- Designed data models and KPI frameworks tracking business performance for BEES marketplace operations, adopted by commercial and operations leadership.
- Developed Power BI executive dashboards consumed by senior commercial and operations leaders to support strategic decisions on trade investment, customer segmentation, and channel performance.

- Performed advanced analyses including customer segmentation (RFM, behavioral clustering) and time-series forecasting to support growth initiatives across LATAM.
- Conducted code reviews and informal mentoring for junior analysts, reinforcing standards on SQL style, dbt model design, and dashboard hygiene.

Junior Data Analyst (BI) | AB InBev — AMBEV / BEES Global

Jul 2022 – Nov 2024

- Automated reporting workflows and improved dashboard efficiency, reducing manual effort across analytics operations and freeing senior analysts for higher-impact work.
- Supported KPI tracking and business analysis initiatives that contributed to data-informed decision-making at commercial level.
- Contributed to analytics infrastructure improvements as part of the strategic transition to the BEES platform.

Junior Data Analyst (BI) | Bluma — Singu / Natura Group

Feb 2022 – Jul 2022

- Built marketing funnels and KPI dashboards that improved visibility into customer acquisition and retention metrics.
- Analyzed product and marketing data using SQL and MongoDB to support go-to-market strategies.

CORE COMPETENCIES

- **Analytics Engineering:** SQL (advanced), Python (advanced), Data Modeling, Star Schema, Layered Architecture, Data Quality & Validation, ETL/ELT, Data Warehouse, dbt
- **Data Platforms:** Snowflake, Databricks, PySpark, Azure Data Lake, Azure SQL, AWS (working knowledge), Git/GitHub
- **Business Intelligence:** Power BI (DAX, Data Modeling, Dashboard Design), Tableau, Data Visualization, KPI & Metrics Design
- **Decision Science & Statistics:** A/B testing & experimentation design, time-series forecasting, customer segmentation (RFM, clustering), applied statistics, ML operationalization
- **Stakeholder & Communication:** Cross-functional collaboration with global teams, executive reporting, requirements gathering, technical documentation

EDUCATION

Specialization in Applied Statistics (Post-Graduation) | Ampli

2022 – 2023

Advanced education in applied statistics, focusing on quantitative methods and data analysis to support strategic decision-making. Key subjects: Management Models and Planning, Digital Analytics and Performance Indicators, Quantitative Methods, Probability and Statistics, Mathematical Analysis, Statistical Quality Control.

B.S. in Systems Analysis and Development | FATEC SP — Faculty of Technology of São Paulo

2019 – 2021

Comprehensive education in systems analysis and development, covering technical documentation, project management, applied mathematics, and programming (Python, Java, Kotlin, Dart). Developed skills in business analysis and systems analysis methodologies.

Technical Degree in Informatics | ETEC — São Paulo State Technical School

2016 – 2017

Foundation in Operating Systems, Computer Networks, Programming Logic, and Hardware. Practical skills in Java, C#, PHP, HTML, and CSS.

LANGUAGES

Portuguese (Native) • **English** (Fluent — daily use with US clients) • **Spanish** (Intermediate)
